Highly motivated Systems Administrator with experience in coding and project management seeking a challenging position in a dynamic organization where I can utilize my technical skills to optimize the organization's software, infrastructure, and drive business growth.

WORK EXPERIENCE

The Boring Company (August 2022 - Present)
System Administrator

- Design, deploy, and manage construction and tunnel networks, servers, and end-user equipment
- Assist directors and managers in project planning, execution, and monitoring
- Provide end-user support for Office 365, Google Workspace, Virtual Machines, Windows, Ubuntu, printers, network appliances
- Develop and implement batch scripts using Python and Windows CLI to automate tasks
- Assist in deployment of network equipment, firewalls, cameras, servers
- Collaborate with cross-functional teams to design and implement IT infrastructure projects

Unique Fabricating (August 2020 - March 2021)
Process Engineering Intern

- Interacted and coordinated with maintenance to minimize down-time
- Assisted with implementing assembly changes efficiently on time
- Programmed tools to lessen down time updating internal systems with product information and tool usage
- Used 2D CAD software, DraftSight, updating building/plant layout regularly
- Created Excel macros, using VBA, to increase service efficiency
- Imported Excel files representing useful data into Power BI for daily presentations on factory productivity

BlackBerry (May 2019 - December 2019)
Software Systems Integration Intern

- Hands on with professional programming using QNX Momentics
- Worked closely with senior developers and sales team to communicate project needs and goals
- Tested newly integrated QNX drivers into client ecosystems for compatibility and fixing issues accordingly
- Helped configure and test QNX OS on multiple types of ARM 32/64 targets
- Integrated OS BSP deliveries from QNX into project ecosystem for testing

EDUCATION

FreeCodeCamp + The Odin Project

Achieve technical skills to formulate suitable full-stack applications. Design and create creative web solutions; improve on existing solutions integrating current and emerging technologies.

SKILLS

HTML/HTML5 CSS JavaScript Python
Active Directory CLI Scripting

CERTIFICATIONS

Microsoft Office Specialist
Certiport - Word, Excel, and PowerPoint
